

EXOLOK

PROTECTION LOCKED IN

Building further on Crewsaver's leading reputation for cutting-edge technology - EXOLOK provides increased security for gas cylinders attached to lifejacket operating mechanisms.

Simple yet innovative. EXOLOK holds a lifejacket cylinder securely in position and provides a clear indication if the cylinder moves, becomes unscrewed or is tampered with.

Constructed from durable and lightweight materials, this simple yet highly effective design is unobtrusive while adding another protection level to the all-important firing system. Compatible with existing products and can be retrofitted to lifejackets with UML or Halkey Roberts 840 operating mechanisms.

Even for those operating in the most demanding environments, with an EXOLOK you can rest assured - your lifejacket protection is always locked in.

EXOLOK COMPONENTS

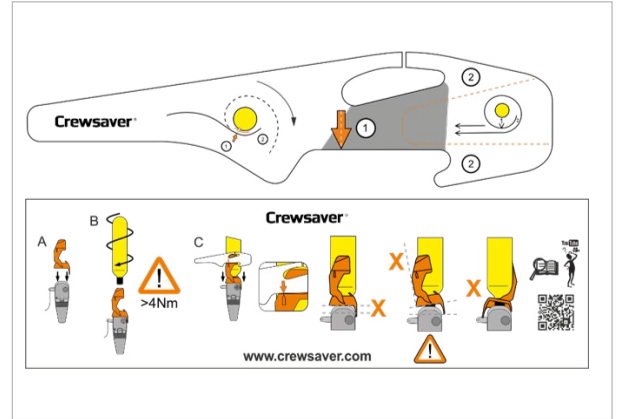

1. EXOLOK UNIT

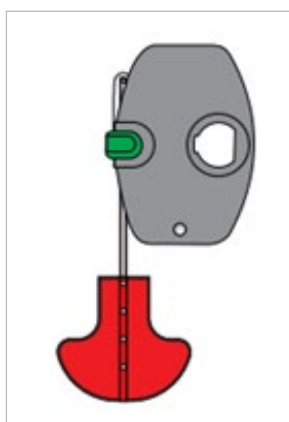

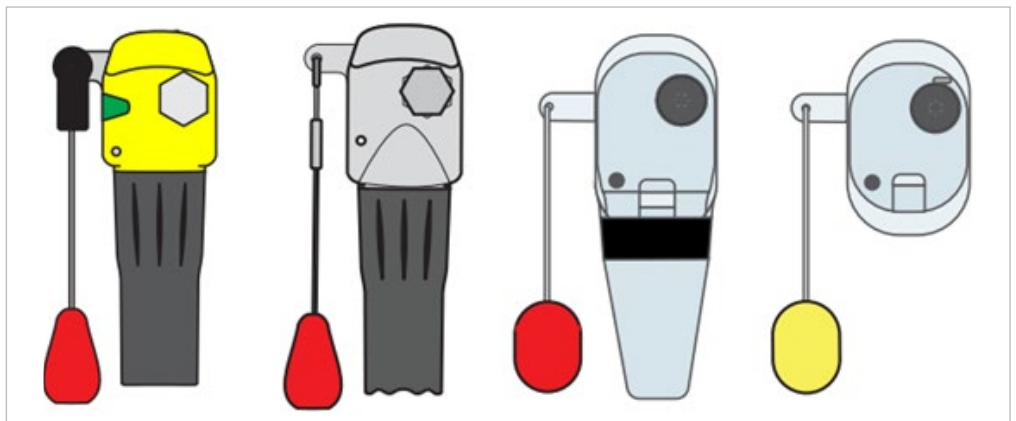

OR

2. EXOLOK LABEL

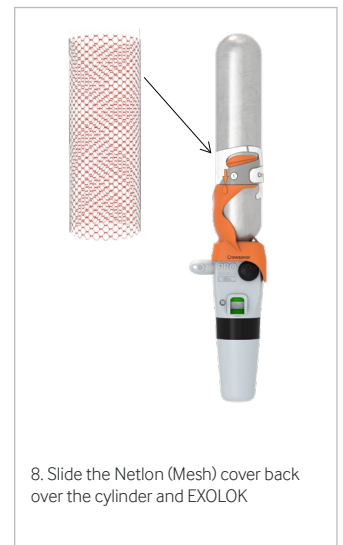

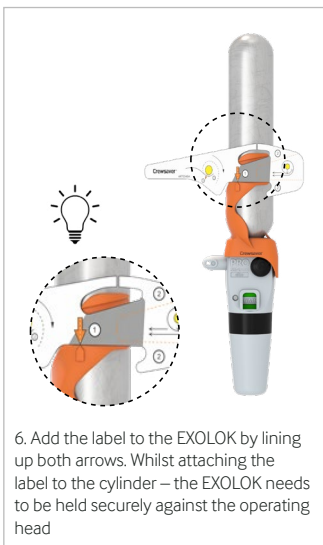

EXOLOK COMPATABILITY

EXOLOK FITTING

1. Correctly open the jacket (Ref to service or user manual) and remove the orange/red Netlon (Mesh) cylinder cover from the cylinder.

9. The jacket can be re-packed (please ensure you follow the packing instructions as laid down in the service manual).
