

# ATTACKSENSE® REACTIVE TARGET TRAINING SYSTEM

Maximum flexibility, immersive training

**Leverage your units' natural competitiveness** to build and maintain marksmanship skills in accuracy, situational awareness and reaction time. Deploy in close quarter battle (CQB) environments to support repeatable and measurable training scenarios

## BENEFITS:

- ✓ Complete shooter and team profile management with shot-by-shot post action statistical analysis ensuring actionable data driving improvement
- ✓ Weatherproof battery and mains power solution allowing the system to be used inside and out
- ✓ Wireless operation minimising trip hazards during training network created by the system
- ✓ Setups can be grown to increase flexibility and or complexity. Compatibility with Survitec Inflatable Wall Systems
- ✓ Versatile operation through competitive leader-boards  
Deploy in fixed scenarios for repeatable and measurable training programmes
- ✓ Comprehensive integration using API (Application Programming Interface) for use with 3rd party mission analysis platforms
- ✓ Cloud enabled for hosting complete post-action analysis and gamification leader-boards

“ **A highly flexible system enabling critical individual and team training** ”

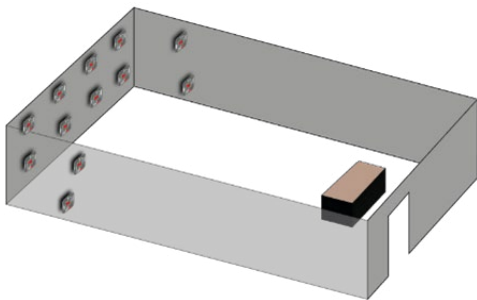

TRUSTED TO  
PROTECT LIVES

# ATTACKSENSE® WIRELESS TARGET SYSTEM

## TECHNICAL DATA

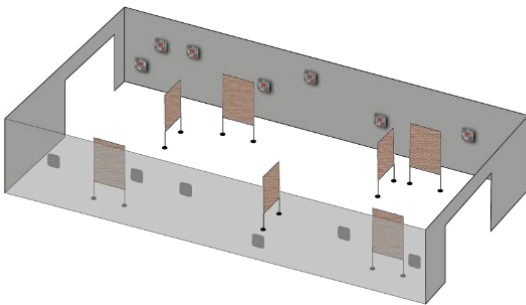

### ATTACKSENSE® WIRELESS TARGET SYSTEM

<b>Supported ammunition</b>	6mm Airsoft, UTM, Simunition & Gel Ball, up to 4 joules at point of impact
<b>Scalability</b>	Up to 65 physical targets per scenario, up to 192 objectives per scenario
<b>Coverage</b>	Up to 1500sqm per access point, multiple access points may be combined for extended area or multi-floor deployment
<b>Wireless protocol</b>	IEEE 802.11 2.4Ghz, worldwide standards compliance
<b>Available target sizes</b>	Three size options 120 x 120mm 200 x 200mm 300 x 400mm
<b>Target configurations</b>	Single zone or combined "head plus body" zones with separate zone actions & logging
<b>Mounting</b>	Wall / pole / beam mounting with combo bracket, or free placement 400mm-2000mm height adjustable floor stand
<b>Operation time</b>	More than 15 hours continuous use per battery, replaceable batteries for additional operation time
<b>Weatherproof rating</b>	IP54 with conformally coated electronics for high humidity and in rain operation

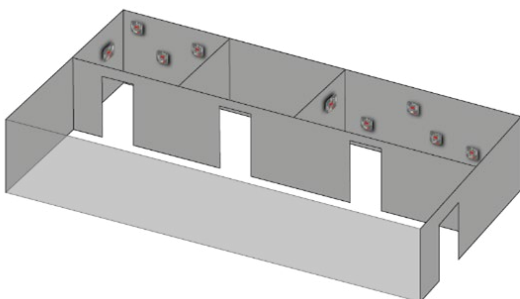

#### Develop Instinctive Shooting Skills:

Deploy on-base for skills training, team building and social activities. Easy to use predefined scenarios for single shooter and competitive multi-shooter activities. Controllable with Range Officer lockout, shooter profiles, statistical analysis and session management. Integrates with Big Screen TV systems for leader-boards and real-time match scoring.

#### Build Tactical Movement and Shooting Skills:

Use Custom Rounds to create immersive practical shooting courses of fire and integrate trigger buttons for interactive progression of objectives from different shooting points. Individual or team training.

#### Deploy to Support Complex Training:

Combine target sizes into head plus body configurations for multi-room training scenarios, with complete control over fixed and random elements, shoot and do-not-shoot scenarios and integration with external events such as pyrotechnics and visual / audible elements.
